

Subject: Introduction IS- Intelligent System) / /

AI

↳ It is the science & Engg. of making machine intelligent.
especially computer programs.

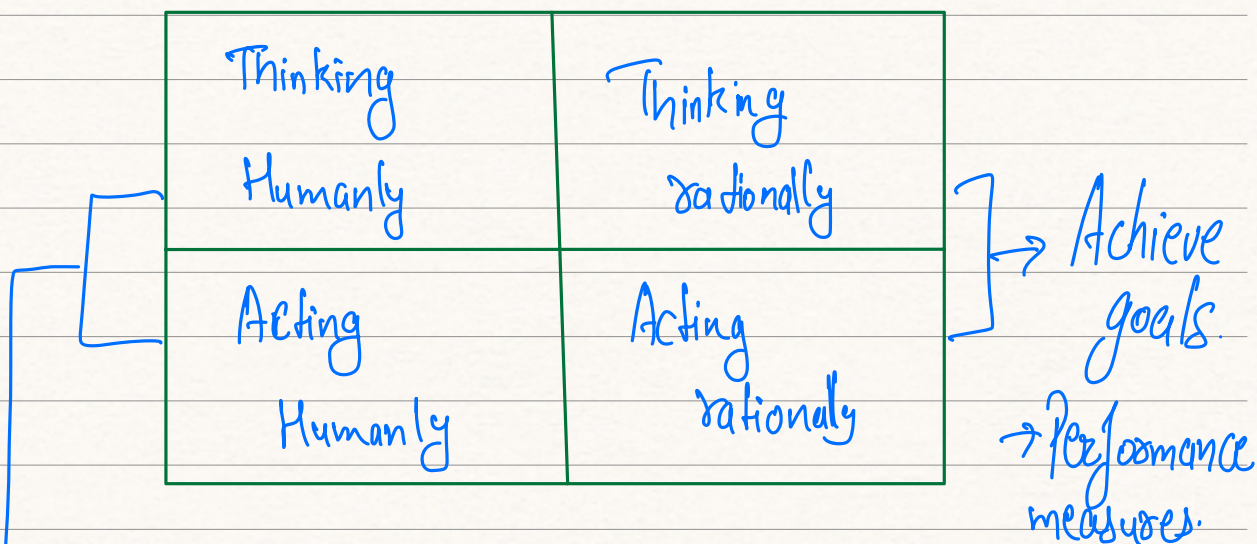

but AI doesn't have to confine itself to methods that are biologically observable

What is Intelligence ?

↳ Intelligence is the computational part of the ability to achieve goals.

AI - view

↳ in 4 categories :-

Subject:

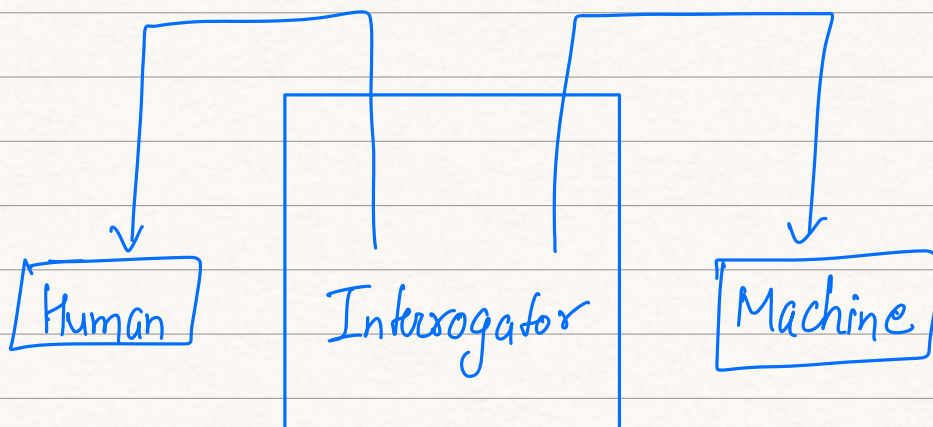

→ Puzzles
Chess } Mathematical problems.

→ Common-sense reasoning

→ Expert knowledge. (Lawyer/Doctor
Diagnostics,
Social behaviour)

1950 :- AI Turing

Turing Test

Subject: / /

- (i) Natural language
- (ii) Knowledge Representation
- (iii) Automated Reasoning
- (iv) Machine Learning
- (v) (Vision, Robotics) for Full Test

↳ If machine pass Test, then machine is intelligent.
