

Subject: / /

* Data Mining Functions :-

① Association and Co-relation :-

Bread and Butter $\rightarrow .75 \rightarrow 75\%$ likely

$\rightarrow$ Confidence Score
(Shows accuracy)

Bread and Pen $\rightarrow .20 \rightarrow 20\%$ likely

② Classification :-

Labelling the data

③ Cluster Analysis :-

④ Generalization

$\hookrightarrow$ OLAP

⑤ Outlier Analysis $\rightarrow$ Performing analysis on the data i.e. excluded during pre-processing.

$\rightarrow$ Sequential Pattern, Trend and Evolution Analysis

$\rightarrow$ Multiple Discipline in Data Mining

$\hookrightarrow$ Statistics

$\rightarrow$ Pattern recognition

$\rightarrow$ Visualisation

$\rightarrow$ ML

$\rightarrow$ Algorithms.

$\rightarrow$ Applications.

→ Database Technology

Subject: / /

- Tremendous amount of Data
- High-complexity of Data
- High-Dimensionality

Types of Datasets

1. Ordered dataset
 - ↳ Audio type, Video type Sequential Data.
2. Record Datasets
 - ↳ Relational Records, Data matrix Documents files.
3. Graph and Network
 - ↳
4. Multimedia Data
 - ↳ Video, Image

Data objects :-

Attribute ^{Collection} → Data objects → Data set

↳ Types of Attribute

1. Nominal → Involves Names, Nomenclature like Name, Hair color
2. Binary → 0/1, Yes/no
3. Ordinal :- Small, Medium, large, Extra large.

Subject: / /

↳ The type of attributes follow meaningful order but can't quantify the difference.

4. Intervals.

↳ no true zero point
↳ temperature, calendar dates.

5. Ratio:-

6. Descrete Attribute

7. Continuous Att.
